

Technology & STREAM Teacher

Sacred Heart of Jesus School is a dynamic, Christ-centered school of excellence located in Wadsworth, Ohio. As part of our academic expansion we are currently seeking a dynamic and creative individual to join our faculty as the Technology and STEAM Teacher for grades PreK-8. We are looking for an educator who shares our passionate commitment to the teachings, culture, identity, and values of the Catholic faith. This teacher will lead our students into a deeper relationship with Jesus while supporting and promoting their academic success! We at Sacred Heart believe that passionate, committed teachers and staff lead students in excellence and form them in virtue. If interested in joining our family we encourage you to contact us!

Position Overview: The Technology and STEAM Teacher will provide direct technology instruction to students in Grades PK-8 based on the standards set forth by the Diocese of Cleveland. The Technology & STEAM Teacher is also responsible for overseeing and coordinating NWEA MAP and State testing in the school.

Academic/Professional Requirements

- Successful teaching experience of at least 1 year at the elementary level is preferred
- Previous experience in a similar technology related position preferred
- Three letters of recommendations pertaining to qualifications
- Valid Ohio teaching license required; Computer Technology Endorsement preferred
- Virtus Training through the Diocese of Cleveland and a successful background check
- Religion certification or a willingness to enroll in the certification process

Additional Responsibilities:

- Testing Coordinator for State and NWEA MAP testing
- Facilitate the integration of technology into grades PK – 8
- Work with our technology company and their staff to manage and update devices, create support tickets, etc.
- Assist teachers in technology planning activities, STREAM and lesson plan development and execution
- Assist in maintaining iPads, Chromebooks, Google apps, and internet filters
- Train teachers in new equipment software
- Troubleshoot technology issues in real time for teachers and staff member
- Support the administration of online assessments, including support of physical set-up, required documentation, and data reporting
- Support the use of technology for special events
- Additional special projects or duties as assigned
- Supervise Lunch and Recess as assigned
